RE: Jacob Mathew
American Concrete Institute – Missouri Chapter Scholarship Applicant

Dear Mr. Shaw:

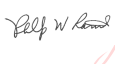

I am pleased to recommend Jacob Mathew as a recipient for the American Concrete Institute – Missouri Chapter's Luke and Billie Snell Undergraduate Scholarship Award. I have known Jacob since May of 2014 when he interned for the summer of 2014 in the Estimating Department at APAC-Missouri, Inc. under my guidance. Jacob has shown to be one of the more energetic and hardworking interns that we have had at APAC. It is clear that he has the drive and willingness to be very successful in his future endeavors in the engineering field.

Jacob is a hard worker who continually strives to learn more through the course of his studies. While working as an intern, he approached each task with an eagerness to get it completed with precision and purpose. Upon being assigned a task, Jacob is able to process the information and produce expected results within a short time frame, often exceeding expectations. He strives to get the most information available to be able to provide the best solution to each given task. He also was a sharp learner of various estimating and engineering computer programs that we use at APAC that he had never seen before. He was tasked with using the programs on a daily basis and responded very well by using them accurately and efficiently.

Aside from assigned tasks, Jacob arrived to work early and never hesitated to work long hours as needed. As part of his internship, he was asked to work a couple of weeks in the field, at night, in a safety sensitive position documenting project progress and information. He was eager for the opportunity and worked well with the project crew to get the needed information submitted each day.

Jacob's eagerness and willingness to learn new tasks put him near the top of the intern class last summer. He prioritizes his school work and strives to put forth his best effort to complete tasks. Jacob's future in our industry is bright and I believe he will put forth every effort to graduate with his degree and be an asset to any future employer.

Sincerely,
